

# iS-X Series

#### **CNC HYBRID TWIN HEAD BENDING MACHINE FOR 3-DIMENSIONAL WIRE FORMS**

## iS-X Series

#### **COMMON MACHINE FEATURES**

- Innovative Machine Concept includes up to 18 servo axes
- Concurrent part forming of multiple wire forms at a time
- Full CNC control with robotics for extremely efficient changeover times
- Upper and lower station form independently
- PC based programming with full featured user friendly programming environment
- Hopper material storage or optionally feed from coil

#### **OPTIONAL ACCESSORIES**

- Multi Radius integrated Turret Tool
- Integrated Vision Inspection system
- Many standard and custom accessories available, please contact the factory.
- Optimally configured into automated manufacturing cell
- Auto-Bend Correct feedback with 3rd party devices available.

iS15F- Shown with optional stress relieving and coating.

## iS-X Series

### **SOFTWARE FEATURES**

- Full Undo/Redo
- Built in IOT functionality for easy implementation to your factory information sytems
- Custom I/O functions available
- Full CNC control
- Automatic Save and Backup utilities
- Integrated Batch Control
- Automatic call and fault recovery with robotics
- System Diagnostics Manager for easy troubleshooting
- Remote Support for Software, free for the life of the machine

#### **TECHNICAL DATA**

| Model              | i6S15H or F           | i8S15H or F           | i10S15H or F          | i13S15H or F          |
|--------------------|-----------------------|-----------------------|-----------------------|-----------------------|
| Wire Ø             | 2.0 <b>-</b> 6.5mm    | 2.5 <b>-</b> 8mm      | 3 <b>-</b> 10mm       | 4- 13mm               |
